

CYPRES - Activation Report

1. **Date of report:** _____ **Person making the report:** _____
Telephone number: _____
e-mail adress: _____

2. Parachutist details

Name: _____ Telephone number: _____
Size and weight: _____ Number of jumps: _____
Number of years in sport: _____ Number of jumps during last 12 months: _____
If the parachute system / Cypres is not personal property, please give the following details
of the owner: Name: _____ Telephone number: _____

3. Equipment details

Type of rig: _____ Date of manufacture: _____
Container material: Cordura Parapack Antron
Type and size of main / number of descents: _____
Date of manufacture: _____
Type and size of reserve: _____
Date of manufacture: _____
Main deployment system: ripcord throwout BOC throwout ROL
 pullout static line

4. Cypres details

Expert Student Tandem Other
 metres feet
 1-pin 2-pin
Date of manufacture: _____
Serial number: _____
Date of installation: _____
Where installed?: _____
By whom installed?: _____
Where was the cutter installed (pack tray, flap #): _____
Who is replacing the cutter?: _____
Is there a number on the cutter seal?: _____ Which?: _____
Was the loop cut?: _____

5. Aircraft details

Type of aircraft: _____ With or without door: _____
Position of parachutist in aircraft: _____
Did aircraft have a pressure cabin?: _____
Was the pressure cabin used / how and when?: _____
Did aircraft descend below the elevation of the departure airfield?: _____
Did aircraft climb slowly after take off?: _____
Maximum altitude achieved prior to exit of parachutist involved?: _____
Exit altitude: _____
Name and tel. no. of pilot: _____

6. Incident details:

Date and time: _____

Location (country / DZ): _____

Where did Cypres activate:

- on the ground level flight during opening of main
- in freefall climbing under open main
- in the aircraft descending during opening of reserve

Estimated activation altitude: _____

Air temperature: ground: 1000ft.: 2000ft.: 3000ft.:

How long was Cypres switched on when it fired?: _____

How many jumps since Cypres had been switched on?: _____

Was it switched on on the DZ?: _____

If not, where was it switched on?: _____

Has the Cypres been away from the DZ except in the aircraft or under canopy since it was switched on?: _____

Was the altitude reference preset for a different landing elevation?: _____

If the main did deploy, did it open

- fast normal slow very slow
- No, the main did not deploy at all

If the main did deploy, was the parachutist in a

- stable position track head down dive
- on his back on his side turning
- spinning unstable combination of those

Please describe the incident in your own words in as much detail as possible:
